

Early Childhood Enrichment Center
Nursery School Program

At Tumbling Tykes we provide children a loving, caring and nurturing child-focused environment. *We strive to:*

- *Build Fine and Gross Motor Skills**
- *Encourage and Blossom Creativity**
- *Develop Self Confidence**
- *Improve Cognitive Development**
- *Foster Social and Emotional Development**
- *Prepare to enter Kindergarten**

Our small class size of 12 children allows us to nurture the individual needs of each child. Our goal is to grow each child individually and in a group setting.

True learning occurs through children's experiences. We provide a range of experiences so that each child will learn, grow, and thrive. Our daily program includes circle time, dramatic play, music and movement, science, language, math, art, story time and much more. We offer an equal balance of cognitive and social development allowing your child to blossom as a well rounded individual. We instill self confidence which is key to the learning process.
